C. P. R. LAND SALES.
C. P. R. land sales increased a million dollars for the past 3 months compared with the three months a year ago.

FORT SASKATCHEWAN.
A sad accident happened here at 5 o'clock yesterday afternoon which caused the death of Mr. Chabot's second son, Lucien, Mrs. Diamond was having her house moved from one part of the village to another. The boy happened to be standing right underneath the chimney. The horses started the building and the whole brick chimney fell on the unfortunate little lad. He was knocked unconscious. Dr. Aylwin was on the spot in a few moments but the little fellow never regained consciousness and died shortly after the accident.

LOCAL.
—Train left Red Deer on time.
—Town council meets to-night.
—Mr. and Mrs. Grogan left for Calgary this morning.
—W. H. Cushing, of Calgary, arrived in town last night.
—Rev. D. G. McQueen returned to Edmonton last night.
—Mr. Archibald, druggist, is laid up with a severe attack of la grippe.
—Weather: Yesterday maximum temperature 47. To-day, minimum temperature, 14.
—J. J. Walsh, of the firm of Heinemann & Company, came in from Calgary last night.
—Eight special trains loaded with immigrants left Ottawa for the Canadian West last Saturday.
—A large attendance is expected at the local meeting to be held in John C. McDougall's office to-night.
—There is some talk of calling Rev. J. S. Scott, of Brantford, Ont., a pastor of the Calgary Presbyterian church.
—C. E. McPherson, Canadian Pacific railway general passenger agent at Winnipeg, arrived in Edmonton last night.
—At the London, England, fur sales yesterday martin dropped 12 1/2 per cent on the corresponding price last year.
—The annual excursion under the direction of the immigration department will arrive in the Canadian West in a few days.
—The 230 settlers who came into the Northwest from Nebraska in January brought with them cash and effects amounting to \$270,000.
—The adjourned business men's meeting will be held in the council chamber this afternoon to discuss ideas for a post office.
—Reports, emanating from the department of agriculture, Washington, say that 18,000 head of Mexican cattle have been consigned for sale to date for delivery in Alberta this year.
—The carnival last night was poorly attended—very few being in costume. No prizes were given. The ice was in good condition and the large crowd of skaters spent a most enjoyable evening.
—M. B. Weekes, Brantford, of Fairchild's survey party, which has been operating in the north, arrived in Edmonton yesterday. The rest of the party will arrive in Edmonton to-night or to-morrow morning.

—Hon. Mr. Greenway, ex-premier of Manitoba, is instituting a vigorous campaign against the alleged lumber combine. Western representatives in the house of commons are also seeking government intervention.
—The choir recital by MacDougall Methodist church, Edmonton, on Thursday evening, April 2nd, promises to be of considerable merit. Instrumental and vocal music will be furnished by the best local talent.
—Calgary Herald, March 30.—Thirty-four carloads of settlers' effects, valued at \$23,900, passed through the customs last week. This morning there are 20 more waiting clearance, having arrived last Saturday night and yesterday.
—Augustus Maloney, of Spring Valley, Minnesota, left Edmonton this morning with a party of four others for a trip sixty to seventy miles north. Another party of four also left to-day for the same district. Both parties intend making extensive purchases of land.
—The twelfth annual convention of the Northwest Territorial Union of Christian Endeavor will be held at Indian Head from Wednesday to Friday, April 15th, 16th and 17th. Special railway rates are being arranged and a large number of delegates from the different societies in the West are expected to be present.

PUDDLE RECITAL.
Vernon Barford's twenty-seventh pupils' recital was held before a large gathering in the English church school room last evening. The entertainment was most successful throughout, the programme being as follows:

WEDNESDAY, APRIL 1, 1903.

SPECIAL BUSINESS MEN'S MEETING.

A large meeting of the business men of Edmonton was held in the council chamber yesterday afternoon for the purpose of discussing proper sites for a post office and court house. Mayor Short occupied the chair and F. F. Tims acted as secretary. The meeting was opened by a speech from the chairman setting forth the reasons for calling the meeting. It had been decided to send a delegation to Ottawa to impress upon the government the necessity of providing Edmonton with a suitable post office and court house. It was thought best to first choose a site so that the delegation could go to Ottawa with a definite request. Offers of sites were then called for and Mr. Mercer, as president of the board of trade read a long list of proffered locations both for court house and post office.

For a court house a site 150x200 along side of the old brick school house, overlooking the valley, at present being torped to the Methodist mission was offered for \$4,000. It was moved that this site be accepted if all arrangements would be satisfactory, and the motion received the unqualified unanimous endorsement of the meeting.

A post office site was then discussed. Numerous sites were chosen only to be rejected and it soon became evident that the meeting could not agree—as it was dividing on sectional lines. Discussion was called for on the question of whether the post office be on or off Boyer avenue and a majority voted in favor of having it off the main street. The price asked for the lots offered were in most cases away beyond their value. One lot 50x100 on a side street was offered for \$15,000—the rate of \$300 a foot. It was then moved that a site could not be agreed upon off main street that a site on main street be accepted. This motion was defeated by a vote of 28 to 24. After another long discussion during which many left the meeting it was decided to adjourn the meeting to resassemble at 4 o'clock, Wednesday afternoon, April 1st.

SUNNY ALBERTA

The following interview with Rev. T. C. Buchanan, published by the Winnipeg Tribune of March 27th, will no doubt be of interest to our readers. Among the missionary officials in Toronto last week for the meeting with the Presbyterian missionary authorities, was the Rev. T. C. Buchanan, of Edmonton, president of the Manitoba and Northwest conference and missionary superintendent for the Northwest. Mr. Buchanan has spent eighteen years in the Northwest, knows it well, loves the country, and is an enthusiast in his work, so he was asked for an interview by The Christian Guardian, which, busy as he was, kindly gave.

"How is your work opening up, Mr. Buchanan?"

"Splendidly. Prospects for both the incoming of settlers and for the work of our church in our section are good, very good. The influx of immigration is going to be extraordinary. It will be a splendid thing to have these English settlers mixed up with the settlers from over the border. You see a man who has been living in the United States does not become a Canadian all at once. It takes some years. And a good admixture of Britons from the old land will be of advantage. By the way, I met, out in Edmonton, an Englishman who had come over from the United States. He had lived in that country forty years, and had fought in the civil war, but he was a thorough-going Britisher all the while."

"You have a grand country, Mr. Buchanan."

"Yes, sir, and I feel it a great privilege to be doing the work I've been called to do. It is a great thing to see a country developing and filling up with people as ours is doing. As to the country itself, it is a glorious one. It has been well called 'Sunny Alberta,' for we have lots of sunshine, and excessive rain is an unusual thing."

"Have you any doubtholders your way?"

"I've not much any, they are not so far away here as they are in the States. 'Any Galsians'?"

"Yes, many Galsians. There are said to be fifteen thousand of them in our country. They keep coming quietly, all through the summer. They are pretty ignorant when they come, and their habit of living on communities makes them hard to reach, and get out of their old ways. But people who have observed them closely say they will be all right in ten years. You know how they dress when they come in—in sheep-skins, and so on. Well, it is surprising how quickly the young women especially adopt our customs in dress when they get the chance. They are bright, smart young people."

"Are they learning English?"

"Ah, now you touch a very important point. Government ought to establish schools among them, and make everything tend to the young learning English. There are very few schools among them. And they are not anxious for schools which, of course, is quite natural. But there ought to be schools sufficient to gather all the children in and give them thorough elementary education; otherwise they will grow up much the same as their parents. It is not easy to get teachers to take schools among them. But proper arrangements ought to be made, unless we want a generation of illiterate and practically foreign voters to grow up in our new country."

ATHLETIC ASSOCIATION

Editor Bulletin.

Now that the season is approaching when the various athletic clubs are talking about organizing, I would like to make a suggestion that has been long in my mind. It is to the effect that the various clubs should consolidate, and form one strong athletic association. In past years there has been a baseball club, a football club, a cricket club, and a lacrosse club; under a separate executive, each securing a precarious support from the devotees of the sport. The consequences has been that Edmonton has seldom excelled in summer sports. Various games have flourished for a short time perhaps, and the first of July Edmonton teams rally forth to meet opponents. They meet there with more or less success, generally the latter, and then all games fall into "innocuous desuetude," to use a much hackneyed phrase.

But if an association of the different clubs were formed, athletics would be put upon a more permanent basis. The association would be strong financially and able to command the support of our citizens who have always been liberal in the matter of athletics. It would thus be able to provide adequate facilities for the different games which its members might desire, and to direct its members toward one particular game in which it might wish to excel; thus providing Edmonton with a team which would do her honor in contests with outside teams. But the chief benefit which such an association might confer upon the sports of our town, could be the securing of a suitable athletic field. Whatever efforts toward this end have already been made, and they are few, have been weak, incoherent and misdirected; and at the present time there is no place where any game can be played with either pleasure or profit. A strong executive, however, with sufficient money at his back, could easily acquire grounds and improve them so that they would not exactly resemble the virgin prairie, which, however, admirable it may be for some purposes, is not an ideal campus.

I contend then, Mr. Editor, for the reasons stated above, that such an association would be the best thing that could happen in the interests of athletics. Hoping that this proposition may be favorably received by those interested, and thanking you for your valuable space,

I am,

R. V. BELLAMY.

Farms

Near Town For Sale.

THE ALANSON FARM:
Containing 400 acres, only two miles from Strathcona and three from Edmonton; over 100 acres under cultivation, large frame cottage, heated by furnace, good frame stables, etc. Price \$30,000 per acre.

And a number of other good farms throughout the district. For particulars apply to

T. A. STEPHEN.

Real Estate Agent, Edmonton.

Office door east of Postoffice.

AN OPEN LETTER

To the Builders of Edmonton District.

Gentlemen: No doubt you have heard and read in the papers recently a great deal about the so-called "LUMBER COMBINE," and the consequent advance of prices. In this connection a few statements of fact from us may be of use. The manufacturers of British Columbia advise us that the advance in price is due to the increased cost of labor and of materials and that this justifies the advanced prices to the trade. Whether this is true or not we are not in a position to judge. But we do know that it is very difficult to get orders for B. C. lumber filled with any degree of promptness. Many of the mills are out of stock and cannot at present ship a car. We therefore claim that the advanced prices are due to scarcity of lumber. The price of any commodity is regulated in our day not so much by the cost of production as by the general demand for the commodity.

As to our own prices we beg to say that we are careful to see that they bear a right relation to cost. We cannot help the rise in B. C. lumber, because the cost price is considerably advanced. But in the lines of our own manufacture such as Windows, Doors, Frames, etc., our prices are lower than the prices for the same articles either in British Columbia or Manitoba. This will indicate to you our position in this matter.

In view of the scarcity referred to if you are building or intend to do so, we advise you to place your order with us as soon as possible so that we may get in a position to fill it when required. We promise to do the very best for our customers that circumstances will permit.

Very Truly Yours,
CUSHING BROS. CO. LTD.
Factories and yards at Calgary and Edmonton.
Branches at Strathcona and Fort Saskatchewan.

"PICCADILLY—THE BEST"

MEN'S CLOTHING

Men's Suits, some new ones. Just about now you'll be glad to see some distinctly new goods, fresh ideas in the way of fabrics—large plaids, broken checks, narrow stripes in brown and gray effects—in fancy chevrons. The man who wants something "a little different" will appreciate the present showing of

PICCADILLY CLOTHING

There is a difference in clothing as in men. There are no better clothes made than those we are showing, but there are higher prices. A hot iron and a ton weight can press out a poorly made suit so that it looks very fine in a window. But only good, careful tailoring and all-wool cloth can make a suit hold its shape and lock well for months and months. No need to argue with yourself, even though you have a good Suit or Overcoat. Will not another be welcome, if it's but to relieve a monotonous sameness? Many of these suits are of medium weight, and you could not find better for spring service. They are all identified by the "PICCADILLY" label. That makes them all the more desirable.

A good address goes a long way in aiding a man to forge to the front. We materially assist in giving you a presentable appearance by furnishing fashionable cut attire at prices below tailor made. Elegant patterns, careful workmanship. No clothing fits like ours.

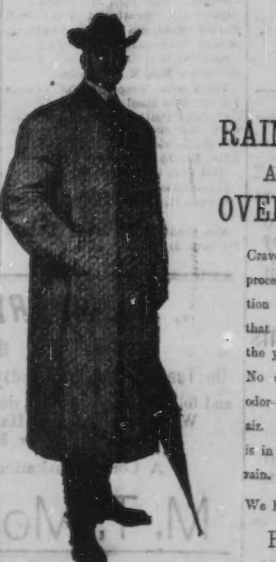

"PICCADILLY—THE BEST"

BOY'S CLOTHING

CLOTHING THAT DEFIES JUVENILE GYMNASTICS

As a parent you know how near useless it is to admonish youngsters not to soil or tear their clothes. The only remedy is to get good clothes, but don't pay too much for them. Clothing is cheaper for a healthy boy than doctors' bills for a sick one. We plead for the boyish boy.

"PICCADILLY—THE BEST"

RAIN PROOF

And other OVERCOATS

Cravenetted fabrics go through a process that goes to the foundation of the cloth—the very fibres that make the wool that makes the yarn are made non-absorbent. No earmarks of waterproof, no odor—no stiffness—is porous to air. The power of "cravenette" is in disguise until attacked by rain.

We have them

From \$10 to \$16

All sizes and colors.

"PICCADILLY—THE BEST"

EDMONTON.

NORTH-WEST FISHERIES

(Continued from yesterday's issue.)
 "Again, I say of the well-eyed pike or pickerel (Micropterus). Such fishes are the waxes of the waters, and their introduction should be attempted with great care and knowledge of the waters into which they are to be placed. Where they become abundant, they effectively kill off nearly all other kinds of fishes in the waters they inhabit, especially if they be isolated ponds or lakes where other fishes do not freely migrate into them. If such ponds or lakes contain only the coarser or less valuable forms of fishes, it may be well to stock them with muskellunge and wall-eyed pike, but if fine fish or other desirable game fish are abundant, it is certainly advisable to prevent these wolves from the waters from exterminating more valuable forms of life. Here again is decided need of biological investigations to determine what waters should be and what should not be stocked with such fish. Of pike, suckers, catfish and similar coarse, voracious fish little need be said. There may be occasionally muddy ponds or isolated lakes where these fish could be safely planted without risk of their overrunning the whole of the waters of the adjacent district; but it may be said down as a general rule that these fish do not need the aid of artificial fish-culture, and they should be kept as far as possible within their present range. To introduce them into virgin waters where they will soon inevitably hold supreme sway, outnumbering and overrunning in an incredibly short space of time the indigenous kinds of fish, is criminal."
 Many people in the Northwest advocate the introduction into our lakes and rivers of the fish known as German carp. These fish were introduced into many lakes in the United States and also in Canada, and are found to be about as desirable in a lake as a crop of Canada thistles would be on a farm, or the the European rabbit has proven to be in Australia. Fishery Inspector Sheppard, of Toronto, in his report on his district, has the following to say of this fish:

"The carp are increasing very rapidly in this division, both in the inland and international waters, and will eventually, in my opinion, do an incalculable amount of damage to our fisheries, and I am afraid they will also destroy our duck shooting by destroying their food, viz. the wild rice, which they are doing in all waters where they are found. I would advise allowing them (the carp) to be taken at all seasons and by any means, and if necessary pay a bounty for their destruction. The carp to my mind, is the most dangerous element we have at present to contend with in our fresh water fisheries, and I cannot impress too strongly my views on taking drastic measures to stop their rapid increase. This matter, in my opinion, should not delay."
 Fishery Inspector Miller, of Qu'Appelle, has the following remarks re fishery matters in the Edmonton district:

"All the lakes in this district are reported to be in a satisfactory condition, and fish in waters protected by guardians are increasing. No difficulty is experienced in enforcing the regulations as people generally appreciate the efforts of the department to preserve a good supply of fish."
 "While the efforts of the department have heretofore been principally concentrated on the larger, whitefish lakes, increasing settlement has brought out the value as a food supply of the small lakes so numerous in this district, which are stocked with the coarser varieties of fish. It is probable that these smaller lakes will prove of greater value in the aggregate to the settler than the large whitefish lakes, the latter being more or less difficult limit in most cases by the Indians and half-breeds. The protection required principally for the preservation of these spring spawning fish consists in preventing the blocking of the streams by fish traps."

"The whitefish lakes under direct guardianship are now in most satisfactory condition, and overmost young reports that the guardians have been able to enforce the regulations without any friction. In most of the lakes fish are said to be large, fat and plentiful. Big-on lake is the only one from which any fish were exported to a distance, shipments from here being made to Calgary and Kootenay. The state of the roads in summer prevents a successful prosecution of the fishery at that time. Buck Lake has also a splendid supply of whitefish but is at present too isolated to be much fished. At Lac la Poudre fish are reported almost as plentiful as in the early days and are a great resource for the resident half-breeds, who make good catches throughout the summer and early winter, but do not fish after the ice is thick. (Saddle Lake is not in good condition, it has been overfished by the Indians and requires a period of rest. The catch is now so small that were the lake closed entirely, no hardship would result. High water has made much improvement in Beaver Lake, which is a very shallow body of water. It promises to be soon well stocked with muskellunge fish."
 "At Buffalo Lake, a very large amount of fishing has been done of late, mainly by hook and line through the ice. Nearly 600 settlers, mostly

newly come Germans, Russians and Galicians resorted to the lake this year, and the guardian estimates that they averaged a catch of over 400 lbs. each, mostly pike. No whitefish were found here, but it is proposed to introduce black bass. Little Devils Lake, the nearest whitefish lake to Edmonton and at one time quite fished out is again stocked with whitefish, one man catching 50 very fine fish at the beginning of the season in a single night. Overseer Young recommends this lake as a most suitable place for a hatchery, it having communication by the Sturgeon river, with Lake St. Anne's and the Saskatchewan. The statistics returned from this district are much more complete than in former years and shows that while the number of persons absolutely dependent on the fishery for a living is probably diminishing, the vastly increased population will tend to fishing being done in many lakes previously neglected. The report calls attention to the shipment of black bass made to Buffalo Lake last fall, and gives Overseer Harrison S. Young full credit for successful delivery of same; also to Mrs. Westhead, of Buffalo Lake, for her persistence in applying for these fish for Buffalo Lake, and expresses appreciation of the assistance given by her to Overseer Young in the work of delivering same.

ROOMS TO LET.

On Fifth street, H. B. R. Apply at premises.
 MRS. MALCOLM McDERMID.

In Regard to WATERPROOFS and TWEED SKIRTS

We would like a chance to show you what we have in these lines.

When we speak of Waterproofs, we do not mean the ill-smelling, ill-fitting, use-on-a-rainy-day affair usually shown under that name. Ours are handsome garments, beautifully tailored, made of lovely all-wool tweeds and covert cloths, which you would never suspect of being waterproof. These are stylish, full-length coats, and look right any day, rain or shine.

Our All-wool Skirts for spring are as right as anything can be.

HOMES! HOMES!

W. H. HOOPER COMPANY

OFFERS ON

MONDAY, MAY 4TH, 1903,

200 LOTS

50 X 100

ON

Kenneth Macdonald Flats

The Finest Alluvial Soil on Earth.

On each Lot enough may be grown to support a family.

The property adjoins Little's brick yard on the South, the Experimental Farm on the North, and overlooks the Saskatchewan on the East.

The opposite bank of the river, rising in natural terraces from the water's edge to an average height of 150 feet, beautifully wooded, affords A PANORAMA OF HARMONY AND DELIGHT.

Edmonton has passed the experimental stage, and will possess in a few years a metropolitan population.

The Railway Question is settled. The Canadian Pacific, Grand Trunk and Canadian Northern are assured quantities.

A fact not generally known substantiates that Edmonton will be a terminus for some years, is that the carrying capacity of the Canadian Pacific exceeds the Oriental and British Columbia trades combined, and the three great roads mentioned will halt before pushing on to the Pacific, thereby making our city of vastly more importance than it would otherwise have been.

Much of the timber is primeval. The principal streets will be boulevarded, and ancient growth furnish overshade.

Maps and schedules of prices open for inspection at W. H. Hooper Company's Office on May 4, 1903.

Real Estate.

W. H. HOOPER COMPANY,

Edmonton.

EXTENSIVE PURCHASE OF LAND

W. A. Campbell, a former Canadian who founded a dairy paper in Portland, Oregon, is one of the American capitalists who have done much to advertise Canada by making very extensive purchases of land here. Mr. Campbell investigated the different portions of the wheat belt and finally chose the Vermilion river valley as the most satisfactory. Last week Mr. Campbell completed a deal which, as he expressed it, "puts him in possession of over 30,000 acres of the most fertile wheat land in the world." Mr. Campbell paid about \$175,000 for the land, which was selected from a large territory adjacent to the land bought recently for the Barr valley, midway between Battleford and Edmonton. Speaking of his purchase, a Tribune reporter this week Mr. Campbell said: "It did not take me long to arrive at the conclusion that the Canadian west provided a better field for investment than any part of America which I have visited. I heard a good deal about the country on the coast, and the reports regarding its wonderful agricultural wealth and resources were so frequent and persistent that I could not very well overlook them. Early last January I arrived in Winnipeg, and since that time I have investigated many of your wheat belts. I also secured the assistance of an expert in helping me decide where to select my land. I finally decided on the Vermilion River Valley just east of Edmonton, where I secured township 52 in range 6, township 53 in range 7, and township 54 in range 7, west of the fourth meridian.

"I have visited many fine agricultural countries, but I never knew of one where the possibilities seemed so great as in this district. Those Englishmen who are about to found a colony there evidently knew a good thing when they saw it. The Canadian Northern main line to Edmonton will traverse the valley, and the road will be graded this year right through the property. I was fortunate enough in securing, in a few years, I confidently expect to see the Vermilion Valley one of the most prosperous settlements in this vast country.

Mr. Campbell says that the establishment of the Barr colony in the valley, while it naturally directed his attention to the district, had very little to do with his decision in buying \$175,000 worth of property there. He bought largely on the advice of his expert. The opinion of the expert was confirmed by the opinions of Ashe and Helinger, Dominion Land Surveyors, who surveyed the purchased property in 1881 and reported as follows: Mr. Ashe says in his report: "The land, is

of an almost uniformly excellent character. The range is as fine as any passed over in the Northwest." Mr. Helinger reported "that the alluvial soil was 18 to 20 inches deep and the subsoil class one on a clay sub-soil, and the water all fresh."

Mr. Campbell's expert reports that the soil is a rich, black mould, free from stones, gravel, or even sand, and would produce by the decay of an abundant growth of wild vegetation through countless years. This deposit of mould is deeper on the rising ground than in the hollows, and varies from one to three feet in thickness. The soil is simply inexhaustible, and will improve from year to year in cultivation.

Mr. Campbell says that his purchase of a large section of land will undoubtedly be followed by other large investments by capitalists with whom he is acquainted both in the east and in the west.

"The impression that Canada is a cold, inhospitable country," said Mr. Campbell, "is gradually dying out in the States. The American settlers make good immigration agents, and from one of them I learned, even before I knew of the Vermilion River Valley, that the climate there leaves nothing to be desired. The cold of the winter is tempered by the chinook winds, and such a thing as a blizzard is unknown in the district, while the rainfall in the summer is sufficient for the production in the greatest perfection of all the cereals."

Mr. Campbell says that probably several hundred families will leave the Pacific coast states for the Canadian Northwest this year. Most of them, he believes, will settle in the district of Northern Alberta and the Vermilion country, as many of them have received most favorable reports from friends who settled in these districts last year as to the country and climate.

REAL ESTATE SNAPS

FREDERICK FITZGERALD & CO. AGENTS

NOTICE!

In answer to enquiries etc., of those whom we have contracted for advertising in THE GERMAN HERALD we beg to say, that when we promised to have the paper issued by this time, we did so in good faith and with all reasonable justification, as all arrangements and that for a New Paper so important preliminary work, had been timed to this end.

Man Proposes and the C. P. R. Disposes.

Our offices are secured and our working staff is engaged and ready to commence on notification. The larger part of our plant has arrived but still some parts, though it has been ordered and shipped, has not yet reached us.

We do expect it at any time now and on its arrival will be in position to commence business at once.

We do most sincerely trust, that businessmen, out of knowledge of some personal experience with the Entirely Unsatisfactory Facilities of Freight Transportation will give us the benefit of their forbearance and still extend to us their good will of which we have been the recipients.

The Time.

In the meantime we have not been idle, but have made a personal canvass of all the German communities within sixty miles and have met with a success that surpassed our most sanguine expectations and the list of our bona fide and already paid up subscribers is open to our patron at any time and the so Guaranteed Large Circulation will convince them of the merit of advertising in the GERMAN HERALD.

Respectfully,

For the Management of the German Herald,

Alfred von H Ammerstein.
